
TECHNICAL SKILLS

Strong: JavaScript/ES6, React, Redux JQuery, HTML5, CSS3/Bootstrap, SASS/SCSS MySQL, SQL, Node.js/Express

Experienced: PHP, MatLab, Apache, Linux,

Tools: Git, Github, Postman, Chrome DevTools, Ubuntu server, MAMP, PHPStorm, Slack, MeisterTask

Applications Developed

[Super Smash Stats] | [Live](#) | [github](#)

- Group project with a team of five developers that manipulates big data from a database, and displays it on a web page where users can search and sort for the information.
- 100,000 matches of data inserted on **Ubuntu** server using a **MYSQL** database with **Node.JS**.
- Used **axios** calls to database to connect the information to a web page created with **JavaScript, React, and Redux**.

[Movie Hopper] | [github](#)

- Independent project using movie information and create a movie schedule for any given day at a movie theater.
- Utilized **JavaScript** framework **React** and **Redux** to make **AJAX/AXIOS** calls to an **API** in order to retrieve appropriate data.

[Piano Match] | [github](#)

- An independently developed memory match game where players listen and match music notes to piano keys.
- Utilized **HTML5** to create a basic skeleton and **SASS/SCSS** and **CSS3** to apply styling.
- Dynamically created piano keyboard with **JavaScript** and **JQuery**.
