TECHNICAL SKILLS

Strong:, JavaScript/ES6, JQuery, HTML5, CSS3/Bootstrap, MySQL, SQL, Node.js/Express
Experienced: React, Redux, PHP, MatLab, Apache, Linux, SCSS, SASS
Tools: Git, Github, Postman, Chrome DevTools, Ubuntu server, MAMP, PHPStorm, Slack

Applications Developed

[Super Smash Stats] | Live **|** github
- Group project with a team of five developers that manipulates big data from a database , and displays it on a web page where users can search and sort for the information
- 100,000 matches of data inserted on **Ubuntu** server using a **MYSQL** database with **Node.JS**
- Used **axios** calls to database to connect the information to a web page created with **JavaScript** and **React**

[Weather Anywhere] | github
- Group project with a team of four developers that lets users pick any location on the map and receive weather information.
- Utilized **JavaScript** and **JQuery** to conduct **AJAX** calls to servers in order to retrieve appropriate data.
- Implemented Google Maps and Weather **APIs** via **AJAX** calls.

[Calculator] | github
- An independently developed calculator application that performs basic mathematical functions.
- Utilized **HTML5** to create a basic skeleton and **CSS3** to apply styling.
- Created calculator functionality with object oriented **JavaScript** and **JQuery**.
