TECHNICAL SKILLS

Strong:, JavaScript/ES6, React, Redux JQuery, HTML5, CSS3/Bootstrap, SASS/SCSS MySQL, SQL, Node.js/Express
Experienced: PHP, MatLab, Apache, Linux,
Tools: Git, Github, Postman, Chrome DevTools, Ubuntu server, MAMP, PHPStorm, Slack, MeisterTask

Applications Developed

[Super Smash Stats] | [Live](#) **|** [github](#)
- Group project with a team of five developers that manipulates big data from a database , and displays it on a web page where users can search and sort for the information.
- 100,000 matches of data inserted onto **Ubuntu** server using a **MYSQL** database with **Node.JS** .
- Used **axios** calls to database to connect the information to the web page that was created with **JavaScript**, **React, and Redux.**

[Piano Match] | [github](#)
- An independently developed memory match game where players listen and match music notes to piano keys.
- Utilized **HTML5** to create a basic skeleton with **SASS/SCSS** and **CSS3** to apply styling.
- Dynamically created piano keyboard with **JavaScript** and **JQuery**.

[Movie Hopper] | [github](#)
- Independent project using movie information to create a schedule of movies for the day at movie theater to view multiple movies.
- Utilized **JavaScript** framework **React** and **Redux** for website design and used **AJAX/AXIOS** calls to an **API**.
